### Job Application

Dear Hiring Manager,

I am writing you in regards to the Guidewire opportunity that Sam has sent to me. I am eager to discuss it with you. Throughout my career, I have impacted business outcomes through effective organization, prioritization, and execution of critical projects. Since accepting my position as a software team lead, I've quickly mastered the skills required for this position and am looking for jobs with a more significant impact. My skills and qualifications are an ideal match for playing a pivotal role in TD's Guidewire cloud upgrade.

Previously, in my lead and software development roles, I have impacted AMA's development methodology to a large degree. I have integrated a test suite into our product, led multiple initiatives with successful outcomes, and organized crucial components of AMA's Guidewire implementation. I am independently motivated but also collaborate well with colleagues and other teams. As demonstrated on my attached resume, I am knowledgeable in many facets of software development. Specifically, I have much experience in Guidewire's PolicyCenter, CustomerEngage, and leading teams.

I have read the requirements for your Guidewire position thoroughly. Although I may not be a perfect match for the role, I'm confident that the skills I have developed over my career, along with my passion for software development, will make me an ideal fit for the role.

I appreciate your time and consideration and look forward to discussing this at your convenience. Please let me know if there is any other information I can provide for you; I'd be happy to send it your way.

Sincerely,

**Tyler Kuipers**
