Job Application for Software Engineer

Dear Hiring Manager,

About Me

Hi! I am a Software Developer with hands-on experience in many different areas of software development. I went to school in Edmonton, graduated in early 2017, and have been working in the industry since then. I am an enthusiastic, supportive, team member who really enjoys solving difficult problems. I have extensive experience in back-end development and have done front-end work as well. I have also performed the responsibility of scrum master, helping lead to the release of successful projects.

Why ReelData.AI

Why Me?

Durng my career as a software developer, I've developed skills in Gosu and Java, object-oriented design patterns, and a knowledge of Agile design methods and principles. This knowledge has enabled me to become proficient at writing easy to read, well modularized, efficient code.

Beyond that, I am someone who is familiar with setting goals and achieving them. I have a proven track record of being able to conceive, plan, develop, and execute strategies resulting in well-written programs. I feel strongly that my software development skills coupled with my ability to work hard and be positive will be of immediate value to ReelData.AI.

Sincerely,

Tyler Kuipers
