Job Application for Senior Software Engineer

Dear Hiring Manager,

About Me

I am a Software Developer with hands-on experience in the industry. I attended school in Edmonton, graduated in early 2017, and have since been working in the field. My enthusiastic and supportive nature is integral to maintaining a collaborative solution-driven environment. Previous performance in lead developer roles has allowed me to directly influence the successful release of projects. I have a proven record of successfully completing assigned tasks from remote locations.

Why Me?

While some may look at the number of years I have been working and decided that I am too new for a Senior Developer position, I have had a lot of experience fulfilling that role in the past. Over the course of my career, I've broadened my skills in object-oriented design patterns, test-driven development, and collaboration with colleagues. This knowledge has enhanced my proficiency in writing easy to read, well-modularized, efficient code.

Beyond that, I am familiar with setting professional goals and achieving them. I have a proven track record of being able to conceive, plan, develop, and execute strategies resulting in well-written software. My development skills, coupled with my ability to work hard and be positive, will be of immediate value to Zenefits.

Why Zenefits

I found your job posting on LinkedIn and was immediately intrigued. After finding out more information from the Zenefits website, I can see how my goals align with the purposes of Zenefits. There's nothing I love more than when I am working with other engaged individuals towards a common goal, and that's what excited me about working here. I see through GlassDoor reviews that Zenefits has a passion for delivering high-quality software to your customers and providing a great product to enable small businesses. Building products that are both high quality and useful is why I started this career, and I am excited at the prospect of working together towards this.

Sincerely,

Tyler Kuipers
